AMPYRA® (dalfampridine) is the only branded prescription medicine indicated to help improve walking in adults with multiple sclerosis (MS). This was demonstrated by an increase in walking speed.

**Selected Important Safety Information**

Do not take AMPYRA if you:

- have ever had a seizure,
- have certain types of kidney problems, or
- are allergic to dalfampridine (4-aminopyridine), the active ingredient in AMPYRA.

Take AMPYRA exactly as prescribed by your doctor.

*Limitations and restrictions apply.*
WHY WAIT?
ASK YOUR DOCTOR ABOUT YOUR WALKING DIFFICULTY

In a poll of more than 2,000 people with MS, 87% of respondents said they experienced some limitation to their walking ability and limited activities that involved walking.*

According to a survey of more than 1,000 US adults with MS, about 46% experienced walking difficulty at least twice a week.†

Of those who experienced walking difficulty, nearly 2 in 5 (39%) said they experienced mobility issues by the time they were diagnosed with MS.†

* According to a 2008 poll, A Patient Survey of Mobility and Exercise Issues Among MS Patients, commissioned by Acorda Therapeutics, Inc. and the Multiple Sclerosis Association of America.

† According to a Harris Interactive poll commissioned by Acorda Therapeutics, Inc. and the National MS Society. July 29, 2011.

“Nobody likes to admit they have an issue. You always want to kind of put on a brave face and say, ‘I’m doing great.’”
- Rick, real MS patient

Selected Important Safety Information

Before taking AMPYRA® (dalfampridine), tell your doctor if you:
- have kidney problems or any other medical conditions
- are taking compounded 4-aminopyridine
- are taking any other prescription or OTC medicines, such as cimetidine
- are pregnant or plan to become pregnant. It is not known if AMPYRA will harm your unborn baby.
- are breast-feeding or plan to breast-feed. It is not known if AMPYRA passes into your breast milk. You and your doctor should decide if you will take AMPYRA or breast-feed. You should not do both.
DO YOU HAVE WALKING DIFFICULTY?

Answer the questions below. If you answer “Sometimes” or “A lot” to one or more of these questions, you may have walking difficulty.

Call your doctor today. The AMPYRA® (dalfampridine) FREE* 60-day trial might be right for you.

*Limitations and restrictions apply.

GET REAL ABOUT YOUR WALKING

1. Since developing MS, have you noticed that your walking is getting worse?
   - Not at all
   - Sometimes
   - A lot

2. Have you noticed that your walking makes it difficult to keep up with friends or family members?
   - Not at all
   - Sometimes
   - A lot

3. Have you ever found yourself late for an appointment, missed a train or bus because you couldn’t walk fast enough?
   - Not at all
   - Sometimes
   - A lot

4. Are there days or periods of time when your walking is noticeably slower?
   - Not at all
   - Sometimes
   - A lot

5. Are you having trouble making it in time to the bathroom or to answer the phone or doorbell?
   - Not at all
   - Sometimes
   - A lot

Selected Important Safety Information

Stop taking AMPYRA and call your doctor right away if you have a seizure while taking AMPYRA. You could have a seizure even if you never had a seizure before. Your chance of having a seizure is higher if you take too much AMPYRA or if your kidneys have a mild decrease of function, which is common after age 50. Your doctor may do a blood test to check how well your kidneys are working before you start AMPYRA.

Please see Important Safety Information on page 10.
Results from two clinical studies show AMPYRA® (dalfampridine) MADE A REAL DIFFERENCE IN WALKING

"Taking my walking pill has become a very important piece of my life. I can walk faster than I did before I started taking AMPYRA."

*Limitations and restrictions apply.

Selected Important Safety Information
AMPYRA should not be taken with other forms of 4-aminopyridine (4-AP, fampridine), since the active ingredient is the same.

Please see Important Safety Information on page 10.
**Important Safety Information**

Do not take AMPYRA® (dalfampridine) if you:

- have ever had a seizure,
- have certain types of kidney problems, or
- are allergic to dalfampridine (4-aminopyridine),
  the active ingredient in AMPYRA.

Take AMPYRA exactly as prescribed by your doctor.

Before taking AMPYRA, tell your doctor if you:

- have kidney problems or any other medical conditions
- are taking compounded 4-aminopyridine
- are taking any other prescription or OTC medicines,
  such as cimetidine
- are pregnant or plan to become pregnant. It is not known if
  AMPYRA will harm your unborn baby.
- are breast-feeding or plan to breast-feed. It is not known if
  AMPYRA passes into your breast milk. You and your doctor
  should decide if you will take AMPYRA or breast-feed.
  You should not do both.

Stop taking AMPYRA and call your doctor right away if you have
a seizure while taking AMPYRA. You could have a seizure even if
you never had a seizure before. Your chance of having a seizure is
higher if you take too much AMPYRA or if your kidneys have a mild
decrease of function, which is common after age 50. Your doctor
may do a blood test to check how well your kidneys are working
before you start AMPYRA.

AMPYRA should not be taken with other forms of 4-aminopyridine
(4-AP, fampridine), since the active ingredient is the same.

AMPYRA may cause serious side effects, including severe allergic
reactions. Stop taking AMPYRA and call your doctor right away or
get emergency medical help if you have shortness of breath or
trouble breathing, swelling of your throat or tongue, or hives.

The most common side effects for AMPYRA in MS patients were
urinary tract infection; trouble sleeping; dizziness; headache;
nausea; weakness; back pain; problems with balance; multiple
sclerosis relapse; burning, tingling, or itching of your skin;
irritation in your nose and throat; constipation; indigestion;
and pain in your throat.

Selected Important Safety Information

AMPYRA may cause serious side effects, including severe allergic reactions. Stop taking AMPYRA and call your doctor right away or get emergency medical help if you have shortness of breath or trouble breathing, swelling of your throat or tongue, or hives.

Please see Important Safety Information on page 10.
What is AMPYRA? AMPYRA is a prescription medicine used to help improve walking in adults with multiple sclerosis (MS). This was shown by an increase in walking speed.

Who should not take AMPYRA? Do not take AMPYRA if you:
- have ever had a seizure
- have certain types of kidney problems
- are allergic to dalfampridine (4-aminopyridine), the active ingredient in AMPYRA

What should I tell my doctor before taking AMPYRA? Before you take AMPYRA, tell your doctor if you:
- have any other medical conditions
- are taking compounded 4-aminopyridine (fampridine, 4-AP)
- are taking any other medicines, including over-the-counter medicines such as cimetidine
- are pregnant or plan to become pregnant.
- are breast-feeding or plan to breast-feed. It is not known if AMPYRA passes into your breast milk. You and your doctor should decide if you will take AMPYRA or breast-feed. You should not do both.

Tell your doctor about all the medicines you take, including prescription and non-prescription medicines, vitamins and herbal supplements.

Know the medicines you take. Keep a list of them and show it to your doctor and pharmacist when you get a new medicine.

How should I take AMPYRA? Take AMPYRA exactly as prescribed by your doctor. Do not change your dose of AMPYRA.

Take one tablet of AMPYRA 2 times each day about 12 hours apart. Do not take more than 2 tablets of AMPYRA in a 24-hour period.

Take AMPYRA tablets whole. Do not break, crush, chew or dissolve AMPYRA tablets before swallowing. If you cannot swallow AMPYRA tablets whole, tell your doctor.

AMPYRA is released slowly over time. If the tablet is broken, the medicine may be released too fast. This can raise your chance of having a seizure.

AMPYRA can be taken with or without food.

If you miss a dose of AMPYRA, do not make up the missed dose. Do not take 2 doses at the same time. Take your next dose at your regular scheduled time.

If you take too much AMPYRA, call your doctor or go to the nearest hospital emergency room right away.

- Do not take AMPYRA together with other aminopyridine medications, including compounded 4-AP (sometimes called 4-aminopyridine, fampridine).

What are the possible side effects of AMPYRA? AMPYRA may cause serious side effects, including:
- serious allergic reactions. Stop taking AMPYRA and call your doctor right away or get emergency medical help if you have:
  - shortness of breath or trouble breathing
  - swelling of your throat or tongue
  - hives

See “What is the most important information I should know about AMPYRA?”

The most common side effects of AMPYRA include:
- urinary tract infection
- problems with balance
- multiple sclerosis relapse
- burning, tingling or itching of your skin
- irritation in your nose and throat
- constipation
- indigestion
- pain in your throat
- weakness

Tell your doctor if you have any side effect that bothers you or that does not go away. These are not all the possible side effects of AMPYRA. For more information, ask your doctor or pharmacist.

Call your doctor for medical advice about side effects. You may report side effects to the FDA at 1-800-FDA-1088.

How should I store AMPYRA?
- Store AMPYRA at 59°F to 86°F (15°C to 30°C).
- Safely throw away AMPYRA that is out of date or no longer needed.

Keep AMPYRA and all medicines out of the reach of children.

General Information about the safe and effective use of AMPYRA

Medicines are sometimes prescribed for purposes other than those listed in a Medication Guide. Do not use AMPYRA for a condition for which it was not prescribed. Do not give AMPYRA to other people, even if they have the same symptoms that you have. It may harm them.

This Medication Guide summarizes the most important information about AMPYRA. If you would like more information, talk with your doctor. You can ask your pharmacist or doctor for information about AMPYRA that is written for health professionals.

For more information, go to www.AMPYRA.com or call 1-800-367-5109.

What are the ingredients in AMPYRA?
Active ingredient: dalfampridine (previously called fampridine)
Inactive ingredients: colloidal silicon dioxide, hydroxypropyl methylcellulose, magnesium stearate, microcrystalline cellulose, polyethylene glycol, and titanium dioxide.
